

HENTIS

One-stop decentralized finance application platform
built on Sui.

What Is Hentis?

Hentis is a one-stop decentralized finance application platform that is making decentralized finance more accessible for everyone by providing all your Defi needs in one place. The Hentis team mission and vision is to build a future of finance that is decentralized, efficient, empowering and value-generated on Sui ecosystem.

This mission include: Hentis Light-speed swap DEX, Launchpad platform and Lending protocol on Sui blockchain. To create flow of liquidity and yield-generation for traders, assists high quality project with Fundraising, Provide Defi lending and borrowing solution for users.

Sui And Hentis Mission

Sui is the first permissionless Layer 1 blockchain designed from the ground up to enable creators and developers to build experiences that cater to the next billion users in web3.

The high scalable technology and inexpensive gas fee, makes Sui an ideal ecosystem to base a future of decentralized finance platform on. Hentis will combine this advantage with Move language blockchain to create a future of decentralized finance ecosystem which consist; Hentis Light-speed swap DEX, Launchpad platform and Lending protocol. Hentis will become an ideal meeting place for traders, lenders and investors of multiple blockchain ecosystems.

Hentis Light-speed swap

Hentis Light-speed swap is a decentralized exchange built on Sui. It enables users to enjoy light-speed swap, advanced-level liquidity, fee discount and friction-less yield on SUI Fungible-Tokens.

How Does Lending & Borrowing On Hentis Work?

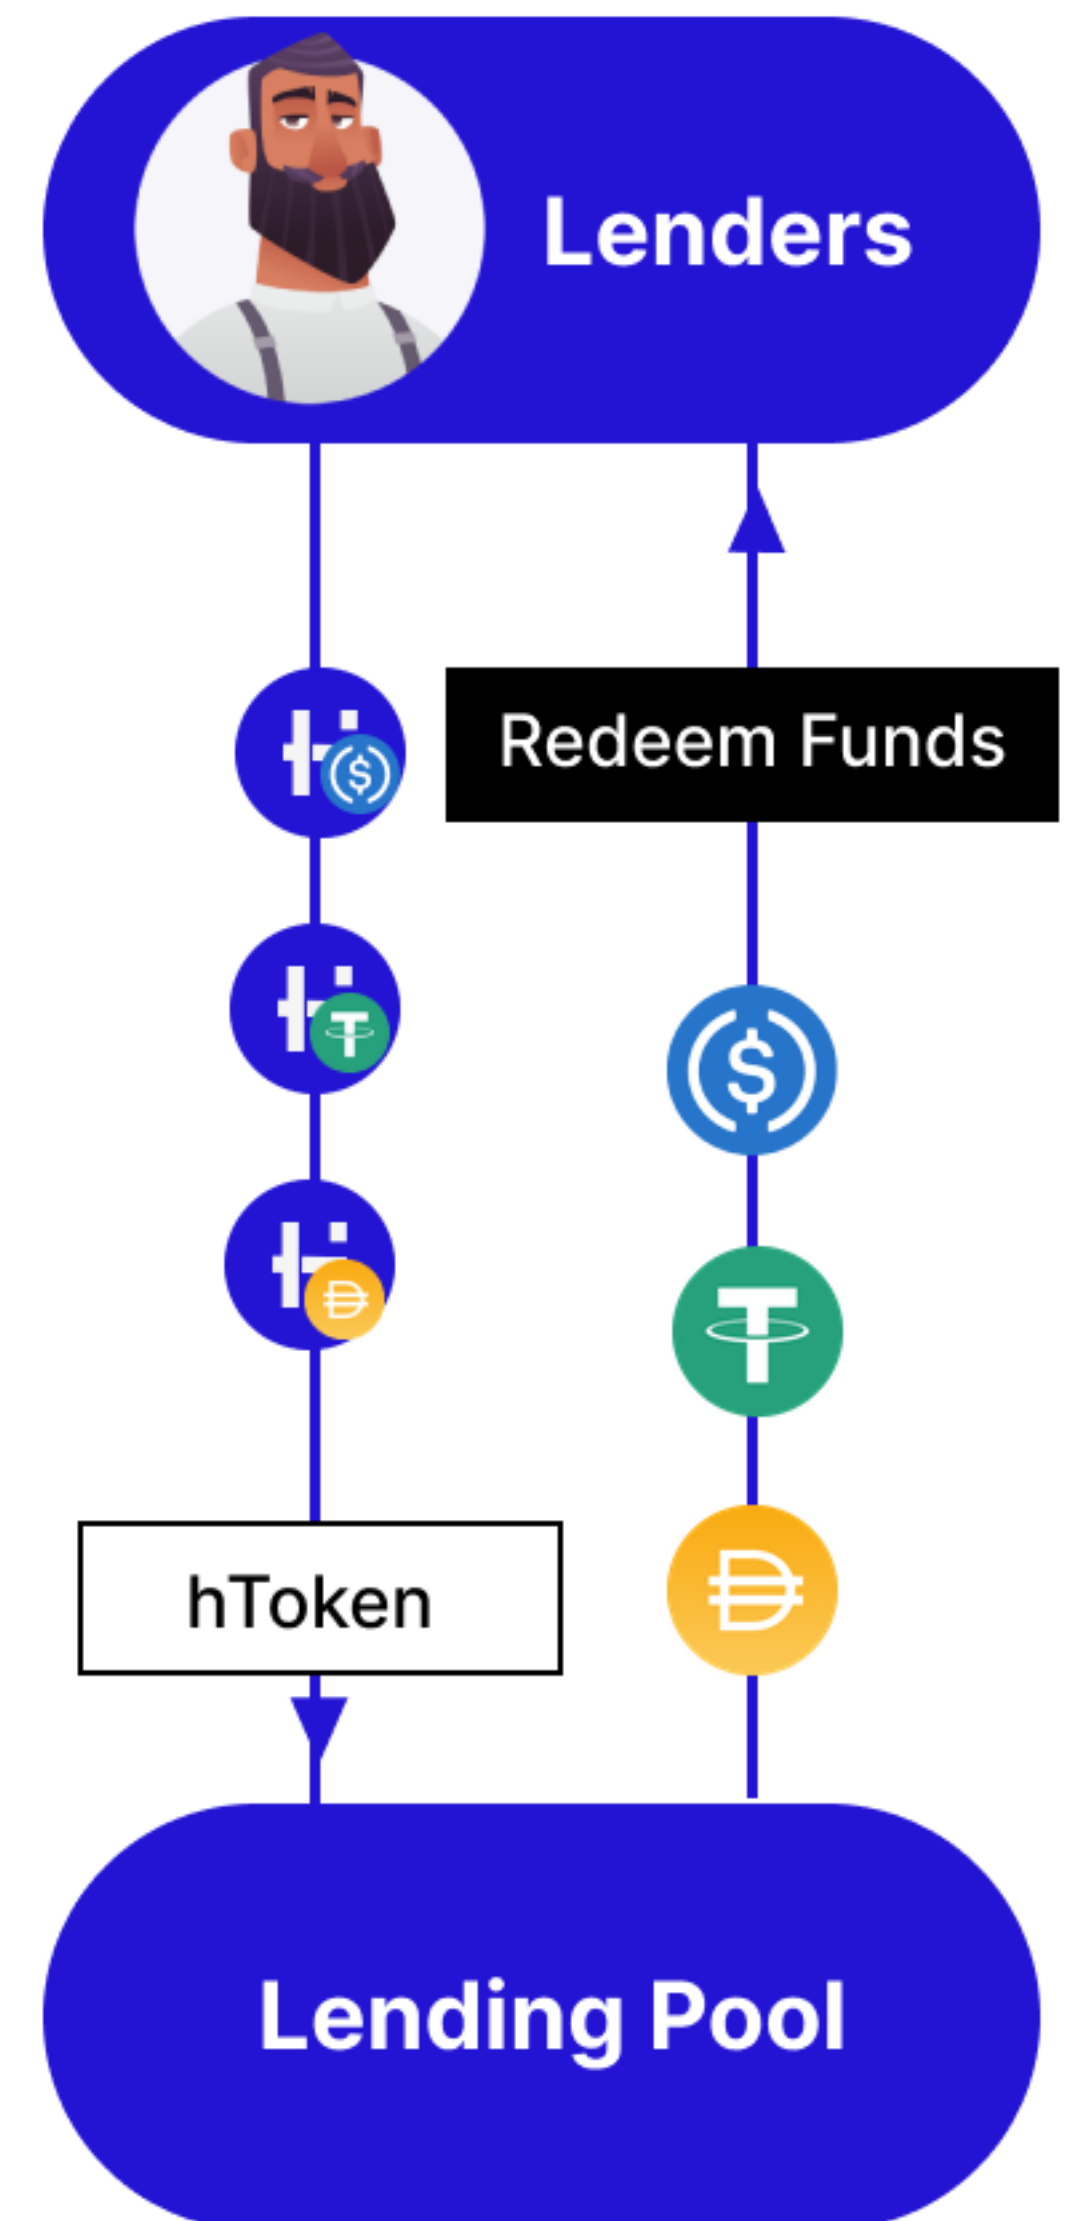

This show how users lend and borrow assets.

What are hTokens?

hTokens are tokenized “claims slips” that represent the funds a user lent into the protocol, along with any interest generated, proportional to their allocation in the lending pool.

Lenders always redeem hTokens 1.1 with the underlying assets the token represents.

How Does Lending On Hentis Work?

Hentis lenders earn yields on both loaned assets and staked HEN.

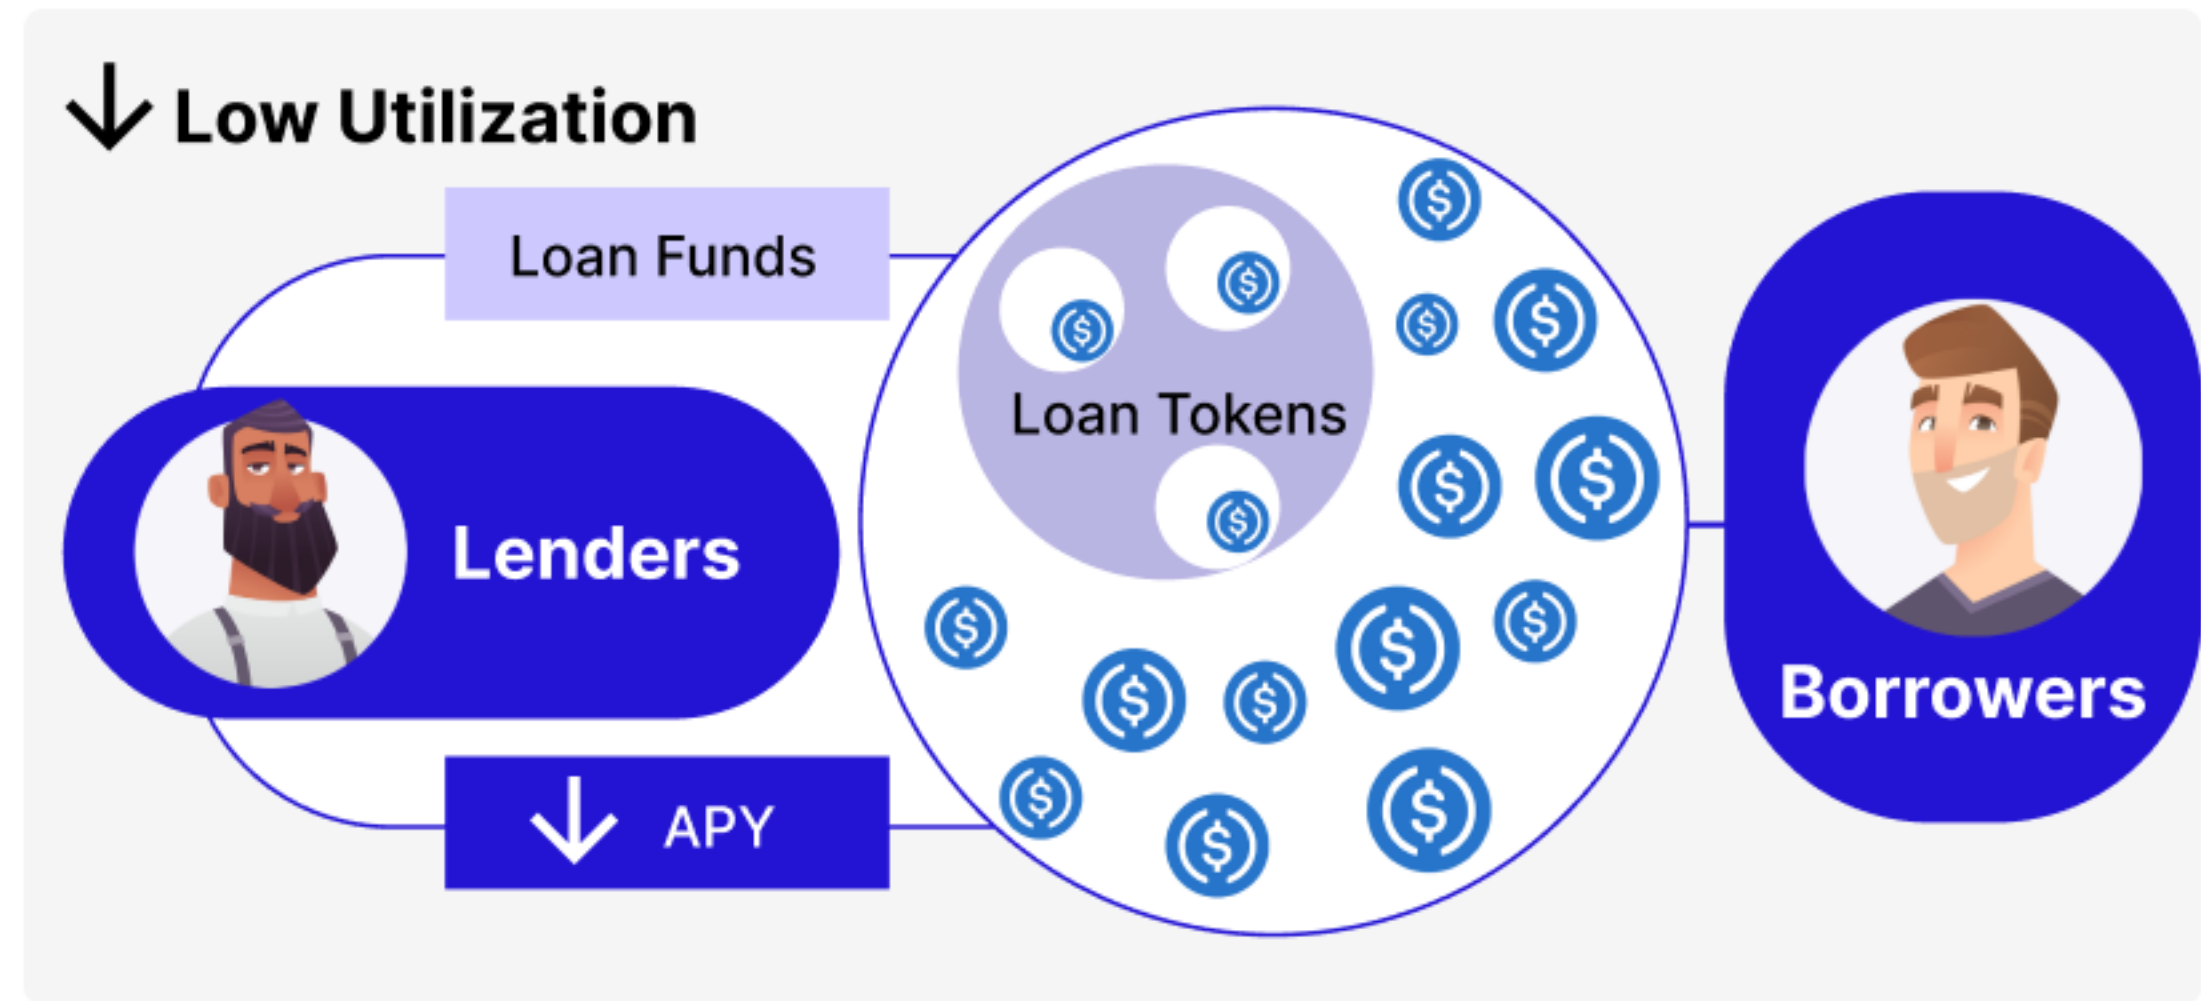

Lenders can choose from various types of pools.

How is Lending Pool APY Calculated?

A lending pool's value is calculated by adding the present value of all outstanding loan tokens in the pool.

APY will change based on the pool utilizations. High utilization pools will have higher yields.

Hentis Revenue Generation

Hentis DEX:
Hentis charge 0.1% platform trading fee.

Hentis Launchpad:
Hentis charge 10% Launchpad fee on every projects.

Hentis Lending Protocol:
Hentis charge 0.1% protocol fee on all borrowing function call and charge 10% interest rate spread.

Hentis Token Utility

Staking

Staking HEN provides access to unlimited incentivize growth and participation in the Hentis ecosystem.

Rewards

HEN token holders have the privilege to enjoy incentives such as token airdrops from ecological partners, staking rewards, lending rewards, fee discounts or limited NFTs.

Lending

HEN token holders are eligible to lend and borrow HEN Token on Hentis markets and use HEN token as collateral to borrow.

Governance

HEN token holders have the right to define the future direction of Hentis. HenDAO is a core component of the Hentis operation ecosystem.

Hentis Roadmap

PHASE I

- Team onboarding
- Project UI/UX design
- Official website launch

PHASE II

- Partnerships
- Completion of Hentis swap and launchpad development
- Hentis swap and launchpad beta launch
- Community airdrop events
- Token launch and listings

PHASE III

- Technical whitepaper and documentations launch
- Lending and borrowing platform launch
- Multi-chain expansion
- Listing on tier-1 CEXs
- DAO realease
- More development
