

HENTIS

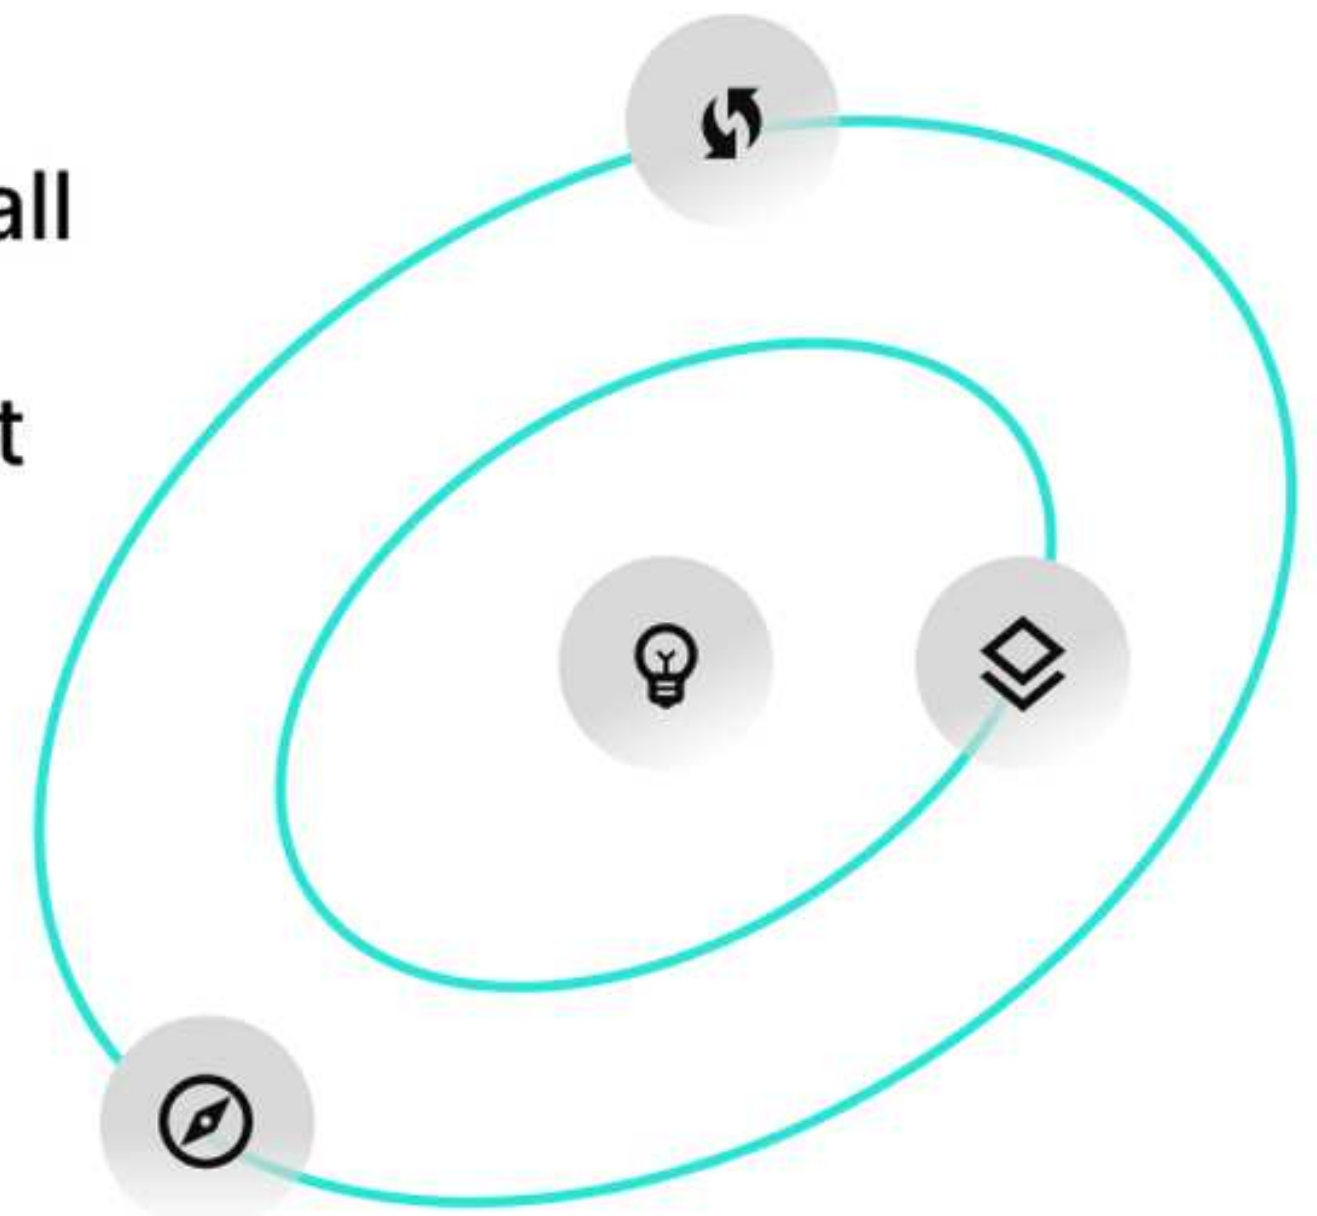

**One-stop decentralized finance
application platform built on Sui.**

What is Hentis?

Hentis is a one-stop decentralized finance application platform that is making decentralized finance more accessible for everyone by providing all your Defi needs in one place. The Hentis team mission and vision is to build a future of finance that is decentralized, efficient, empowering and value-generated on Sui ecosystem.

This vision include: Hentis Light-speed swap DEX, Launchpad platform and Lending protocol on Sui blockchain. To create flow of liquidity and yield-generation for traders, assists high quality project with Fundraising, Provide Defi lending and borrowing solution for investors.

Sui And Hentis Mission

Sui is the first permissionless Layer 1 blockchain designed from the ground up to enable creators and developers to build experiences that cater to the next billion users in web3.

The rapid growth of projects building on Sui ecosystem with high scalable technology and inexpensive gas fee, makes Sui an ideal ecosystem to base a future of decentralized finance platform on. Hentis will combine this advantage with EVM-compatibles blockchain to create a future of decentralized finance ecosystem which consist; Hentis Light-speed swap DEX, Launchpad platform and Lending protocol. Hentis will become an ideal meeting place for traders, lenders and investors of multiple blockchain ecosystems.

Hentis Light-speed swap

Hentis Light-speed swap is a decentralized exchange built on Sui. It enables users to enjoy light-speed swap, advanced-level liquidity, fee discount and friction-less yield on SUI Fungible-Tokens.

Hentis Lending Protocol

Hentis lending protocol is a decentralized lending protocol built on Sui ecosystem to provide all-in-one, peer-to-peer lending solutions with decentralization and transparency to ensure maximum reliability for users.

Hentis Borrowing Market

Hentis borrowing market allow SUI Fungible-tokens to be used as collateral to borrow assets and having the algorithm agree on the interest rate, the user redeem the collateral by returning all principal and interests.

Hentis Lending Market

Hentis lending market allow supply of SUI Fungible-tokens with an algorithm agree interest rate. It allocate interests based on the weight of the supply.

Hentis Token Utilities

The HEN token is the utility token and governance token of the Hentis ecosystem with a limited total supply of 500,000,000.

Staking

Staking HEN provides access to unlimited incentivize growth and participation in the Hentis ecosystem.

Rewards & Incentives

HEN token holders have the privilege to enjoy incentives such as token airdrops from ecological partners, staking rewards, lending rewards, fee discounts or limited NFTs.

Governance

HEN token holders have the right to define the future direction of Hentis. HenDAO is a core component of the Hentis operation ecosystem.

Collateral to Borrow

HEN token holders are eligible to lend and borrow HEN Token on Hentis markets and use HEN token as collateral to borrow.

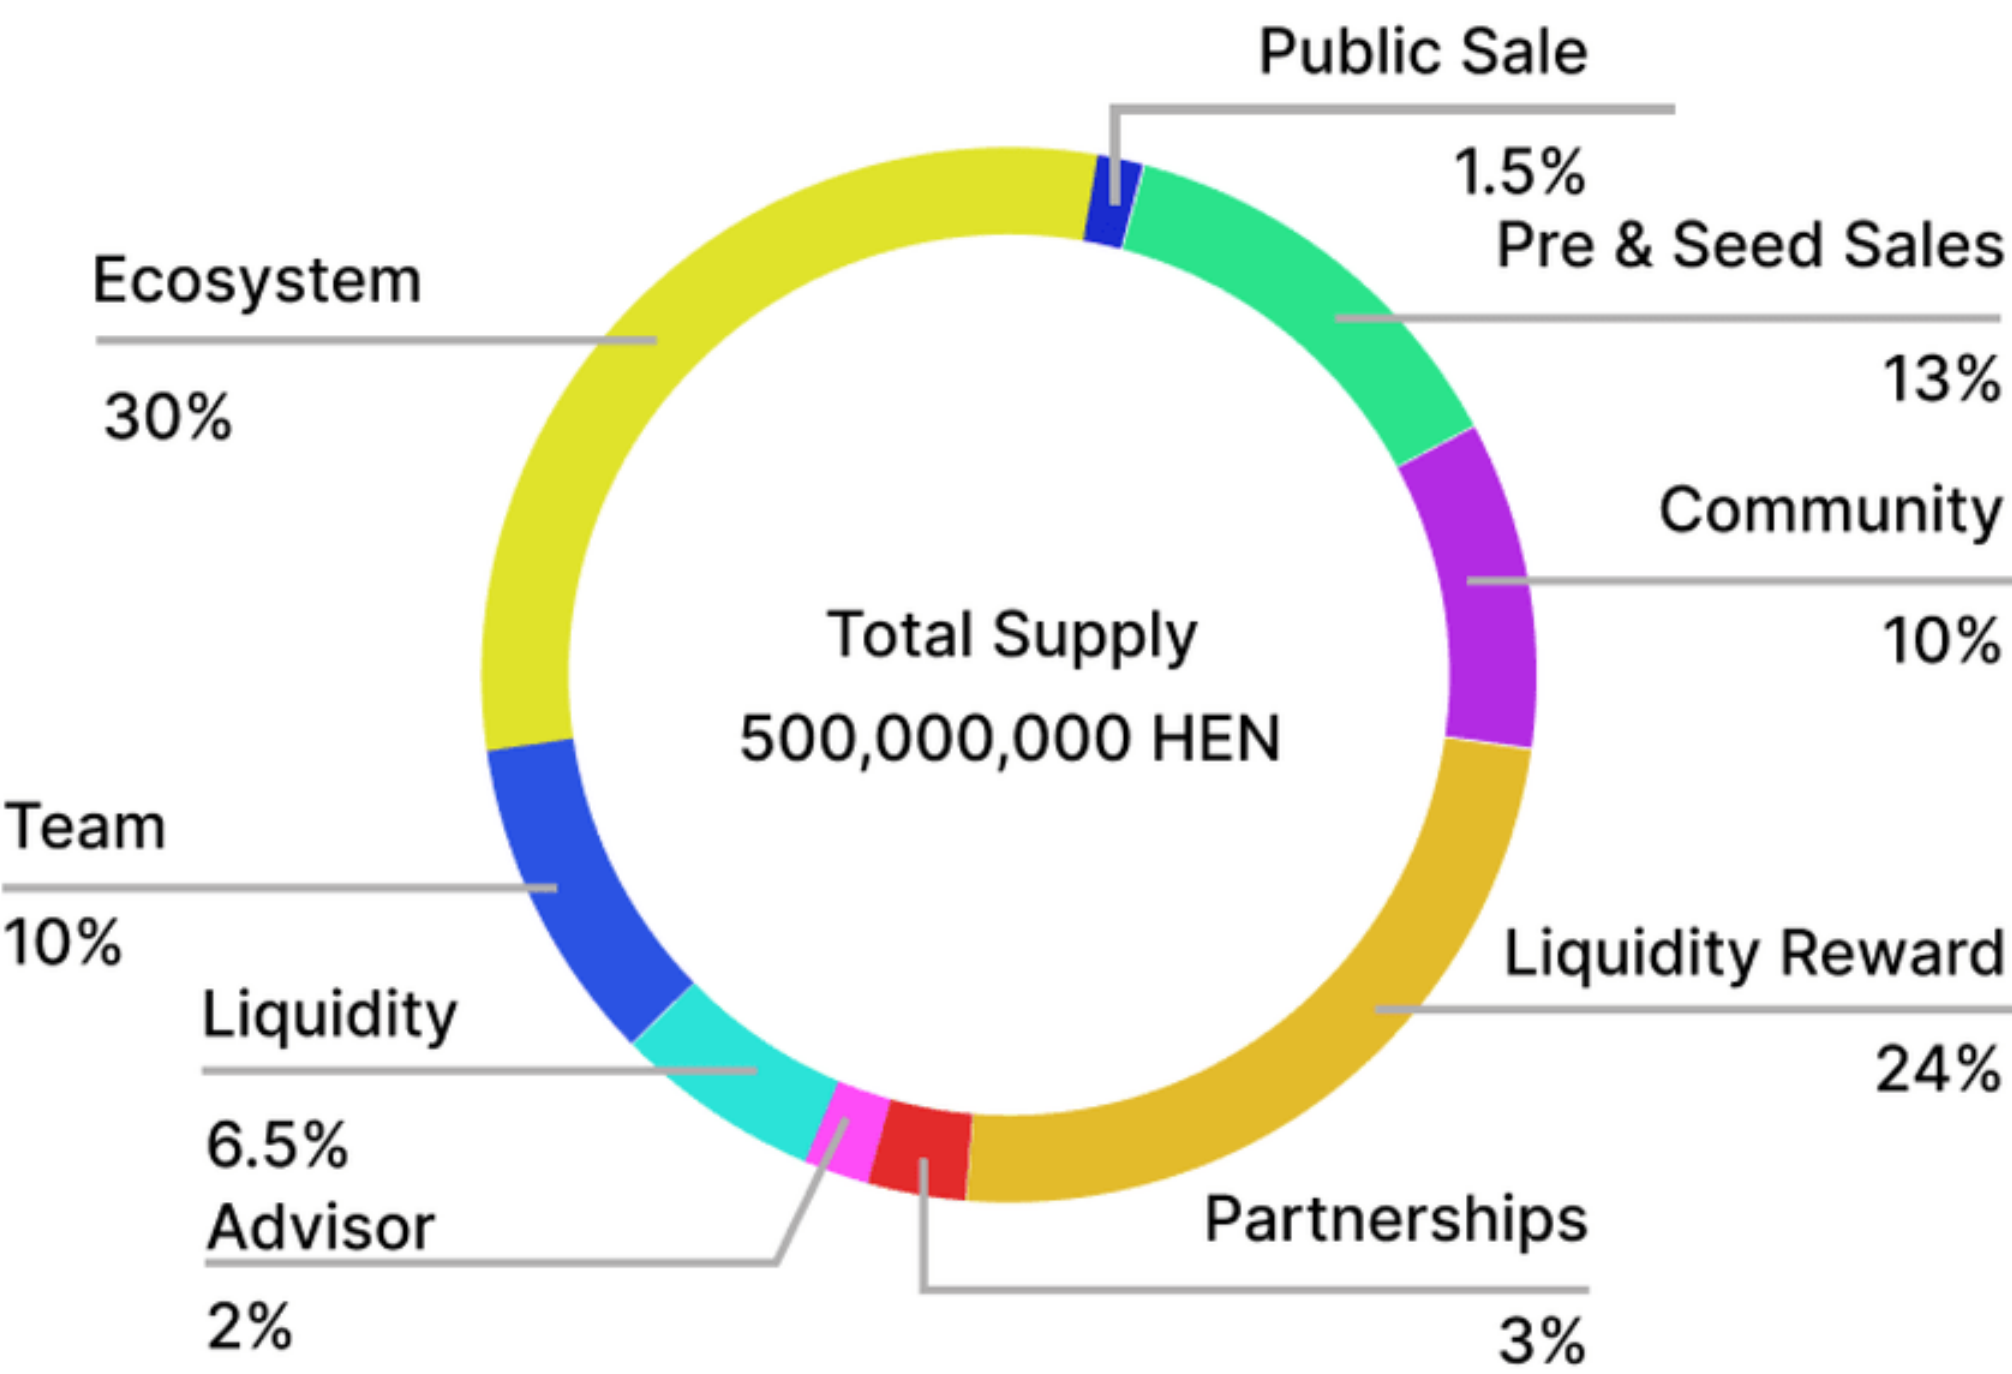

Access

HEN provides access to limited Hentis ecosystem such as exclusive IDO, games, merch, events, and services.

Token Distribution

10% of the Hentis token total supply will go to the community, 13% to seed investors and early backers, 1.5% to public investors, 30% to ecosystem treasury, 6.5% to liquidity, 10% to team, another 2% to advisors, 3% to partnerships and the remaining 24% will go to liquidity rewards.

Hentis Roadmap

PHASE I

Team onboarding
Project UI/UX design
Official website launch

PHASE II

Partnerships
Completion of Hentis swap and launchpad development
Hentis swap and launchpad beta launch
Community airdrop events
Token launch and listings

PHASE III

Technical whitepaper and documentations launch
Lending and borrowing platform launch
Multi-chain expansion
Listing on tier-1 CEXs
DAO realease
More development

THANK YOU
